## CAREER SUMMARY:

---

Solution-oriented and analytical Full-Stack Developer with 6+ years of experience in designing, developing, and modernizing enterprise applications using .NET (Core/Framework) and Angular. Skilled in software architecture, monolithic-to-microservices migration, and cloud integrations. Adept at leading development teams, mentoring junior developers, and ensuring high-quality software delivery.

## WORK EXPERIENCE:

---

GPI Holding – Vienna Insurance Group

Full-stack Developer | February, 2020 – Present

- Rewrote the main client-side application, improving performance and user experience.
- Integrated third-party services to enhance system capabilities.
- Developed platforms for partner companies to streamline business processes.
- Mentored junior developers, conducted code reviews, and introduced best practices, improving team efficiency and code quality.
- Designed and implemented microservices solutions, successfully transforming a legacy monolithic application into scalable services using .NET Core and MS SQL.
- Ensured a smooth transition from older MVC-based applications (.NET Core/.NET Framework, Bootstrap, MS SQL) by providing ongoing maintenance and support.

Lambda Games

Junior Full-Stack Developer | Aug 2018 – Feb 2020 | Georgia

- Provided support & optimization for legacy WPF applications built with the .NET Framework & MS SQL.
- Developed a web-based affiliate marketing platform using Angular, .NET Core, Amazon MWS, and eBay API, streamlining partner integrations.
- Supported project coordination, ensuring collaboration between development teams and stakeholders.
- Developed a CMS-based website for the Georgian Competition Agency, in partnership with an EU-funded project using STRAPI CMS.

BDO Georgia

Software Tester | Jan 2018 – Aug 2018 | Georgia

- Conducted manual and automated testing for web applications, ensuring high performance and reliability.
- Collaborated with developers to identify and resolve software defects, improving overall product quality.

## RELEVANT PROJECTS:

---

WeBuy inc

Freelance Web Developer | 16 September, 2024 – 17 February, 2025

- Developed a custom web application based on React and .NET, enabling users to easily find and purchase items on eBay with tailored search filters.
- Integrated advanced filtering options to refine product searches based on specific criteria, enhancing user experience and efficiency.
- Implemented a 24/7 monitoring system using Azure services, which automatically tracks listings and sends real-time alerts to users.
- Utilized Azure Portal for deployment and CI/CD pipelines through Azure DevOps, ensuring smooth and continuous integration and delivery.

## EDUCATION:

---

Tbilisi State University

Bachelor of Computer Science – Software Engineering

Komarov Tbilisi Physics–Mathematical School №199 2008–2012

## SKILLS:

---

### Programming & Frameworks:

- .NET Core / .NET Framework (C#)
- Angular (RxJS, NgRx, Material UI)
- TypeScript, JavaScript
- WPF (MVVM), Blazor (Basic Knowledge)

### Database & Cloud:

- MS SQL Server, PostgreSQL
- Entity Framework Core, Dapper
- Azure (App Services, Functions)

### Development & Architecture:

- Microservices Architecture
- RabbitMQ
- Monolith-to-Microservices Migration
- REST API, gRPC
- CI/CD (, Azure DevOps)

### Soft Skills:

- Team Leadership & Mentoring
- Agile & Scrum Development
- Code Reviews

### Language:

- Georgian : Native
- Russian : c1
- English : b2
